Swim Training Platform Decking Fix Instructions

There are a total of three (3) pieces of decking that make up the top of the platform. The decking pieces overlap each other at the joints. To keep the platform decking from separating, eight (8) #10 x 3/4 inch, stainless steel screws need to be installed at the joints between each piece of decking. Along these joints, pre-drill a 1/8 inch hole diagonally from one piece of decking that goes through to the adjoining piece of decking, as shown in 'Figure A'. Drill four holes along each of the joints at 14", 20", 40" and 46" from the end of the deck piece. Install a #10 x 3/4 inch screw into the pre-drilled hole as shown in 'Figure B'. This will hold the two pieces of decking together.
